ENERGY INFORMATION NETWORKS AND SYSTEMS

Start: as soon as possible

We are looking for a Student Assistant to support us with automatizing a couple of tasks in the daily routines of the department. Those tasks include automatizing content management of the department's web appearance, e.g., announcing new theses, paper publications, or news.

Responsibilities:
- Develop tools for workflow-automatization
- Write clean and maintainable code
- Learn about existing workflows and automatize them if possible
- Clean up web appearance of the department

Requirements:
- Experience in Programming, e.g., Python or Java
- Familiarity with Web design (html, css, js) recommended
- Strong attention to detail and commitment to delivering high-quality work
- Ability to work independently and manage time effectively

Duration and Working Hours:
The position is initially limited to a period of three months. The working hours are flexible and can be up for negotiation, with a planned working time of 20-40 hours a month.
